Low: APC 50,000 /g max., mold 500/g max., coliforms <10/g, salmonella negative.

PESTICIDES/HEAVY METALS

Nutra Products garlic is randomly selected & tested for pesticides using a FDA/PAAM Method (commonly referred to as the Luke Procedure). The results of the screened compounds showed compliance with the pesticide list and tolerance levels approved for use in California. The pesticide list and tolerance levels are published by the California League of Food Processors. Individual lots were also screened for heavy metals using a Food Chemical Codex procedure. The screen included nine heavy metals: antimony, arsenic, bismuth, cadmium, copper, lead, mercury, silver, and tin. No heavy metals were detected.

PACKAGING

Packaged in 50 pound cartons.

RECOMMENDED STORAGE

For proper storage, containers should be stored in a cool, dry place with liner tightly sealed. Shelf life is guaranteed for two years from date of shipment when stored in original, unopened container at <70°F (21° C) and <65% relative humidity.

COUNTRY OF ORIGIN

United States and China.

Revision Date: 3/17/04
