NutraSelect™ *Odor Controlled* Garlic Powder

DESCRIPTION

Nutra Products, Inc. NutraSelect *Odor Controlled* Garlic Powder is produced from a proprietary variety of mature, premium grade garlic bulbs, *Allium sativum* L., specially grown and hand selected for their nutraceutical marker content. Whole, fresh bulbs are separated into individual cloves, hand trimmed, hand peeled, washed and then gently dehydrated to preserve key actives using a proprietary process that virtually eliminates garlic odor. The process results in exceptional control of odor, color, micros and defects. The product is then milled to the optimal particle size distribution. The result is an odor controlled and super-clean snow white powder with full allicin potential but with *very low garlic odor, no specks, no defects* and a guaranteed Aerobic Plate Count of *less than 50,000 per gram* upon request.

USAGE

Garlic has been consumed as a medicine since ancient Egyptian times. It has been extensively investigated both scientifically and clinically for its antibiotic, antiplatelet, and antihyperlipidemic activities. NutraSelect *Odor Controlled* Garlic Powder and Granules are ideally suited for nutritional supplements, especially for enteric and clear-coated capsules and tablets where an odor controlled and high quality product appearance is desired. The granules are a large, uniform, free-flowing particulate and are extremely well suited for high speed tableting. One pound (0.45 kg) of dehydrated garlic is obtained from approximately 3 pounds (1.36 kg) of fresh prepared garlic.

FEATURES & BENEFITS

Odor controlled with full Allicin potential: Makes odor controlled capsules and tablets while delivering the full allicin potential of nutraceutical garlic.

Super-clean, Defect-free Color: Snow white powder and creamy white granules make pure, speck-free clear-coated tablets and capsules.

Low Micro Levels: Low microbiological levels are achieved naturally without the use of irradiation.

Manufacturing Expertise: Careful selection of raw material and gentle dehydration assure that key actives are maintained.

Quality Consistency: Lab certified allicin yield and microbiological levels.

Economy and Availability: Available year-round at a stable, economical price.

QUALITY CONTROL

Nutra Products, Inc. nutraceutical garlic meets all Public Health Standards and is produced in accordance with Good Manufacturing Practices in Manufacturing, Packaging, or Holding Human Food (21 CFR 110).
