

Enhance Your Family's Health with **Alkemy™**
Enhanced Water that is *Preferred over*
the Leading Sports Drink!

Alkemy™ is enhanced quality water that will balance your electrolytes and pH resulting in an energized body that functions at its very best. In fact, *Alkemy™ was shown in a recent clinical study to be preferable 2 to 1 to Gatorade*, the leading sports drink. Alkemy™ is scientifically proven to hydrate.

Electrolytes are critical to your health by allowing your body to maintain normal blood pressure, regular sleep patterns, focus, proper cardiac rhythms, endocrine balance and intestinal balance, along with the benefit of increased muscle strength. *Drinking Alkemy™ helps to keep your body in peak physical form whether you're exercising or at rest.*

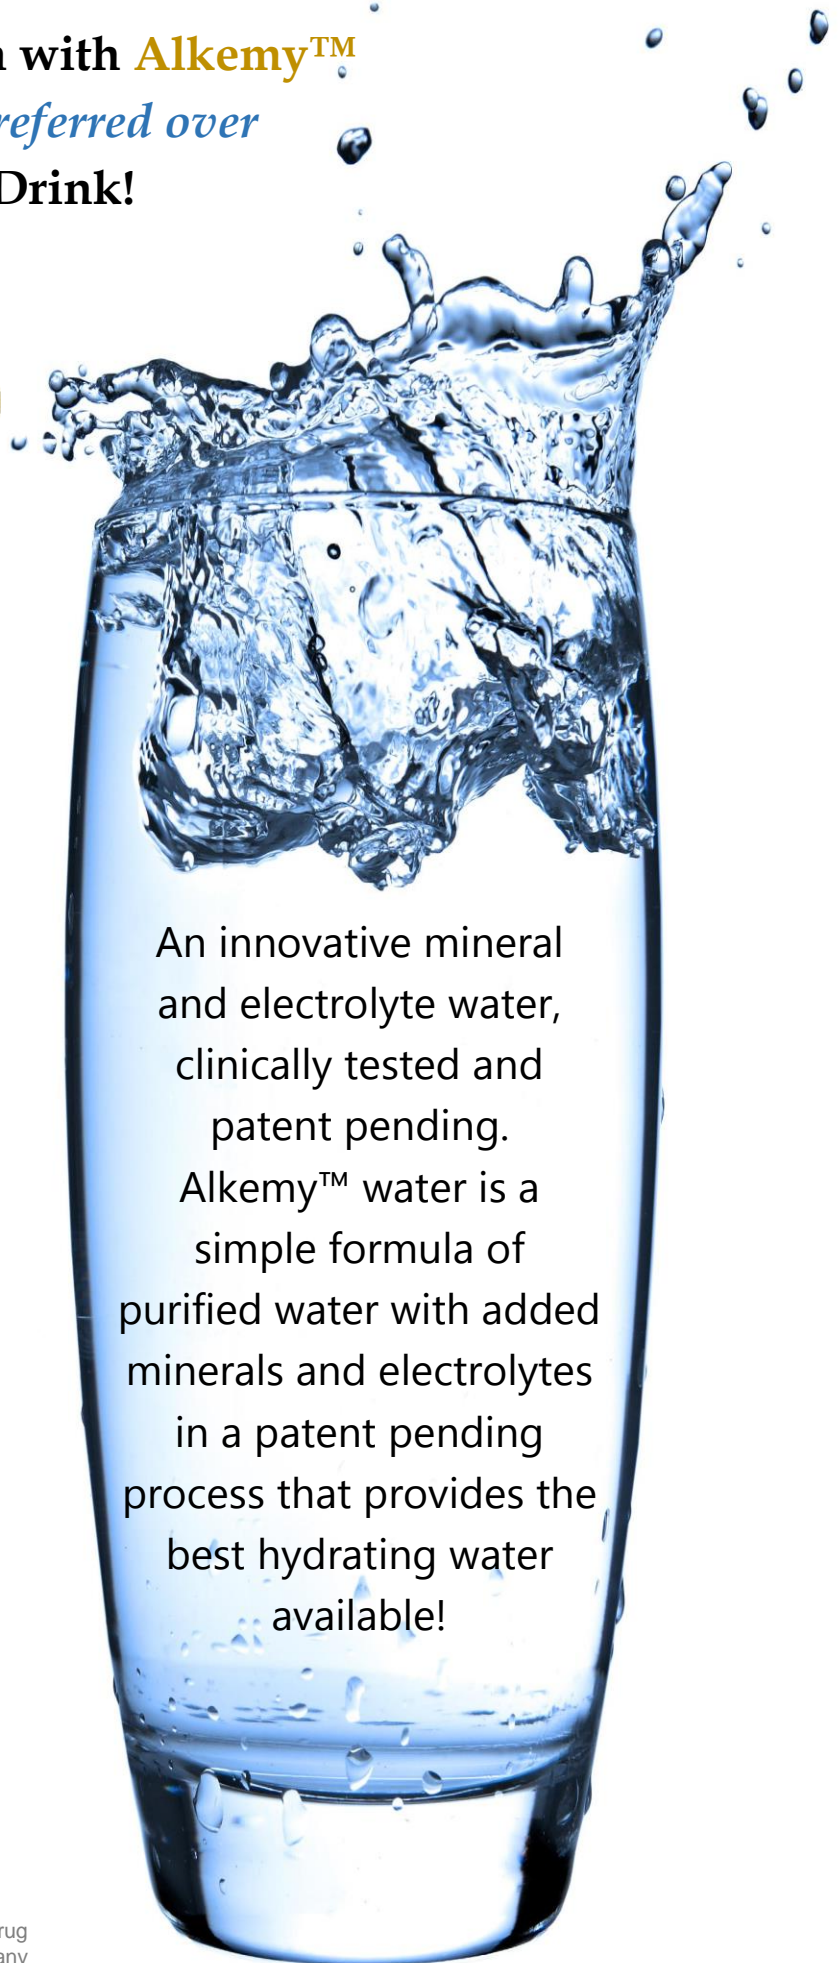

Modern diets are highly acidic. Our bodies, however, function the best when they are at the very least neutral, but ideally alkaline. When excess acidity is occurring in our bodies, we do not have the ability to efficiently carry oxygen to all areas of the body, most critically the brain. *Drinking Alkemy™ helps your body to function at its best by fighting acidity.* Just some of the benefits you will enjoy after drinking Alkemy™ include *reducing body fat, fighting fatigue, aiding in healthy digestion, supporting your immune system, and increasing your overall health.*
