DENNIS W. ADAIR, Pharm.D., Ph.D.

Dennis Adair is president of Adair Associates, a pharmaceutical consulting group, and provides technical, regulatory and quality consulting services to the pharmaceutical and biotechnology industries. Dennis has broad experience in technical product development, technology assessment and technology transfer. Areas of involvement include active substance development, formulation development and process scale-up, quality specifications and analytical development, packaging development, site and facility audits, and production start-up for a wide variety of dosage forms. Dennis has held research and development management positions at CIBA-Geigy (now Novartis), Hoffmann La Roche, Schering-Plough, and Oclassen pharmaceutical companies. As Senior Director, R&D for Oclassen, he was responsible for the development and staffing of all aspects of technical development and technology transfer, as well as clinical supply, QC and QA. This position included significant domestic and international collaboration and site audits for active substance, finished product and process evaluation for acquisition and commercial production.

Adair Associates, Inc. was established as a pharmaceutical consulting organization in 1997 when Oclassen Pharmaceuticals merged with Watson Pharmaceuticals. Since that time Dennis has provided pharmaceutical consulting services to numerous companies, at times serving as the 'Technical Project Manager' for some of the companies. From the period of December 2005 to January 2007 Dennis served as interim Vice-President of Pharmaceutical Sciences for TransOral Pharmaceuticals, Inc. (now Transcept Pharmaceuticals, Inc.) until a permanent replacement was functioning. Dennis has since returned to consulting and project management on a project / contract basis.

Dennis received his degrees, both the Pharm.D. and Ph.D. (Pharmaceutical Chemistry with a major in biopharmaceutics), from the University of California San Francisco. He maintains an appointment as Adjunct Professor of Pharmacy in the UCSF School of Pharmacy and is active in several professional associations. In addition, he has participated in many seminars, training courses and workshops for the profession.
